

Footfall categorization

From a demand perspective, each of the PT projects can be categorized as below:

Category	Scale	Description
A	High	Daily usage levels of approximately 600-1000 per day. Typically near railway station, bus stand, religious places, busy commercial areas
B	Medium	Daily usage levels of approximately 300-600 per day. Typically near commercial areas, offices, public spaces, parking areas
C	Low	Daily usage levels 0-300 users per day, Typically near slums, in residential neighborhoods, low-density commercial areas
