Advocacy Effort

Key Government Stakeholders

Sector Players

Key Takeaways

- **Rapport Building**
- **Benchmarking – Baseline - Confidence**
- **Innovative designs** developed by 7 Districts - Dehed HWWS model
- **Demonstration of WASH**
- **Technical support** to Clubs, CSRs and Government
- **Leveraging – within and outside Govt**
- **Convergence – only funds or cross learning**
- **Written Instructions – GR, Circulars**

Relevant Issues!

Availability, Access, Adequacy, Design

Functionality, Finance, Execution, Service Providers

Definitions – Qualitative Aspects

Adequacy Norms

Components	Details	Desired Norms
Component 1	a) Gender segregated toilets with handwashing point attached b) b) Girls toilets to include incinerators	1 unit each for every 40 boys and girls
	Water supply in each toilet blocks and urinal, for flushing	At least one tap
Component 2	Group handwashing facilities with soaps	1 outlet for at least 10 Students
Component 3	Drinking water	At least 1 source inside the school premises
Component 4	Operation and maintenance, consumables and repair of facilities per Year supply	Regular
Component 5	Behavior change initiatives in schools	Regular

Operation Cost (Based on UNICEF study in 6 districts: 2016)

School wise Average Annual Operation Cost

- Water and Electricity Bills
- Human resource to operate
- Consumables – soap, bleaching powder, cleaning material, etc.

Category/ Cost Per student	Drinking Water Supply	Boys Toilets	Girls Toilets	Boys Urinals	Girls Urinals	HWWS + Soap	Average Total WASH Cost	Average No of Students as per DISE data	Average Cost Per School
UP+S+HS(KGB V)	13	3	6	4	6	23	47	444	20720
P+UP+S	9	8	7	8	7	23	60	354	21063
P+UP	19	15	15	15	15	23	101	176	17732
P	40	32	34	32	34	23	192	50	9575

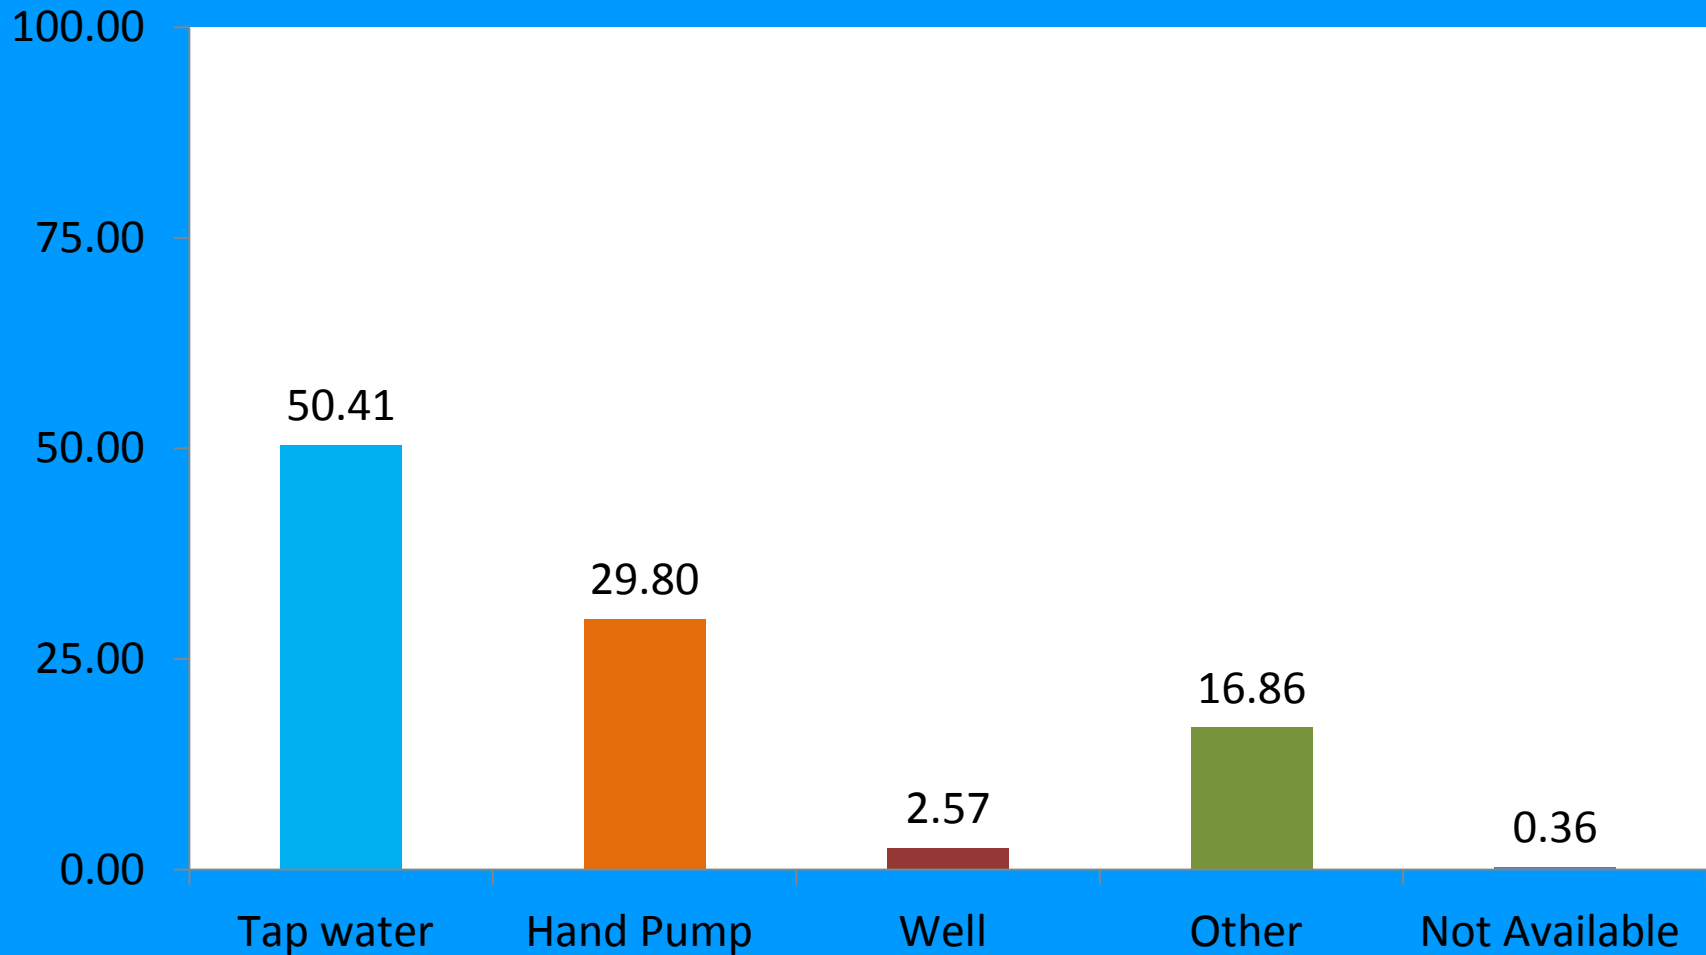

Maintenance Cost (Based on UNICEF study in 6 districts: 2016)

School wise Average Annual Maintenance Cost

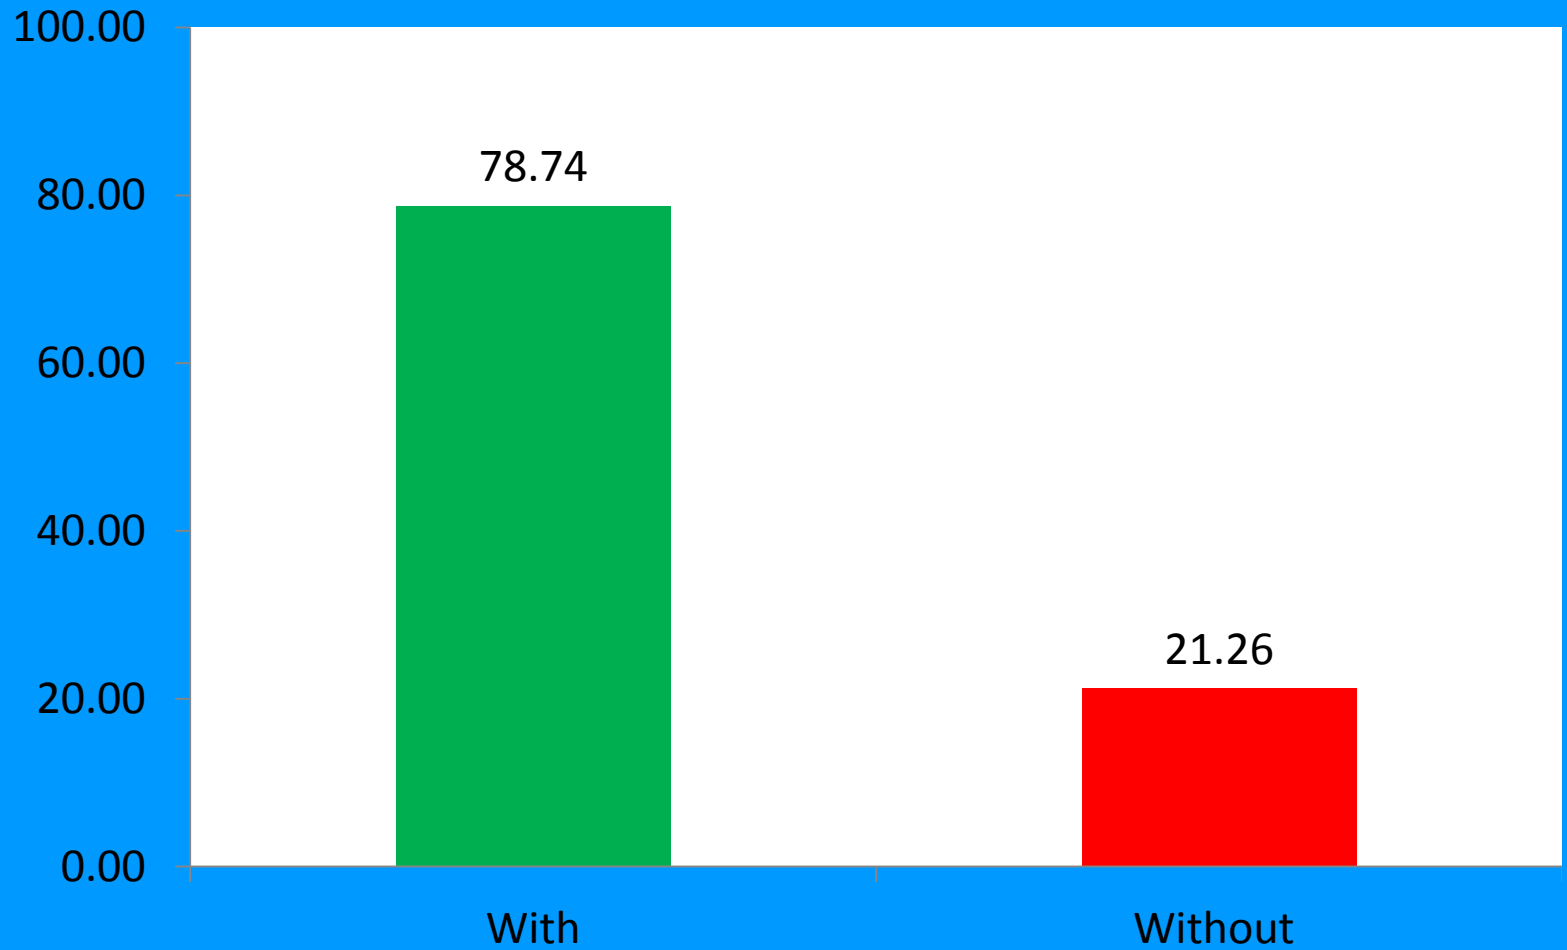

- *Leakages in pipeline*
- *Emptying and cleaning of a drinking water tank*
- *Repairing or replacement of tiles of toilets or urinals*
- *Emptying of toilets pits*
- *Maintenance of soak pits, etc*

Category/Cost per student	Drinking Water Supply	Boys Toilets	Girls Toilets	Boys Urinals	Girls Urinals	HWWS + Soap	Average Total WASH Cost	Average No of Students as per DISE data	Average Cost Per School
UP+S+HS(K GBV)	6	1	4	0	10	11	27	444	11840
P+UP+S	4	5	8	7	12	9	38	354	13275
P+UP	8	8	10	13	18	15	66	176	11528
P	12	14	27	25	33	25	131	50	6525

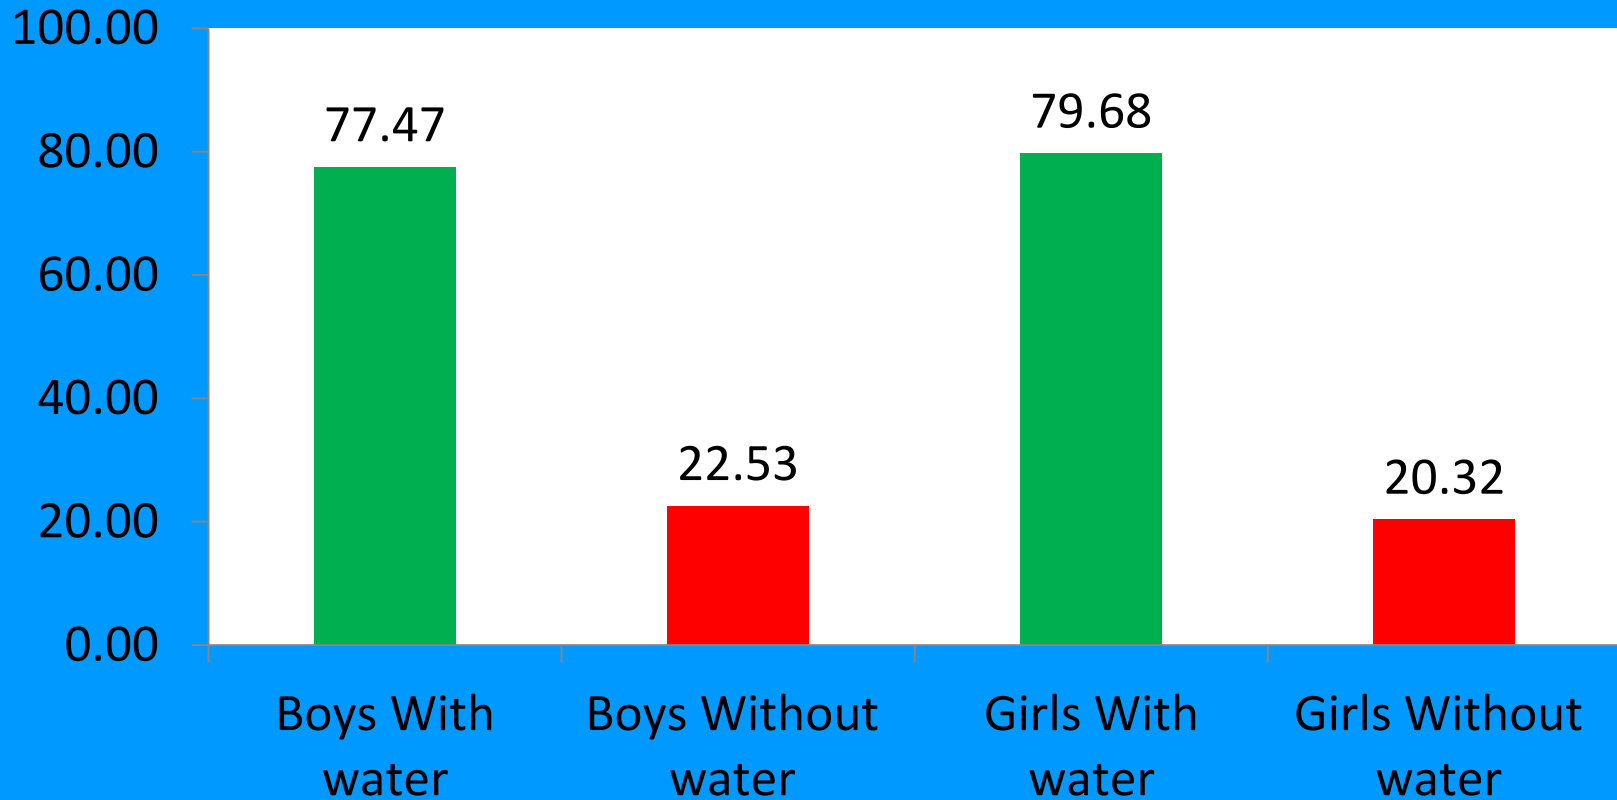

Water Availability in Schools (2015-16)

Water Availability in Boys and Girls Toilets

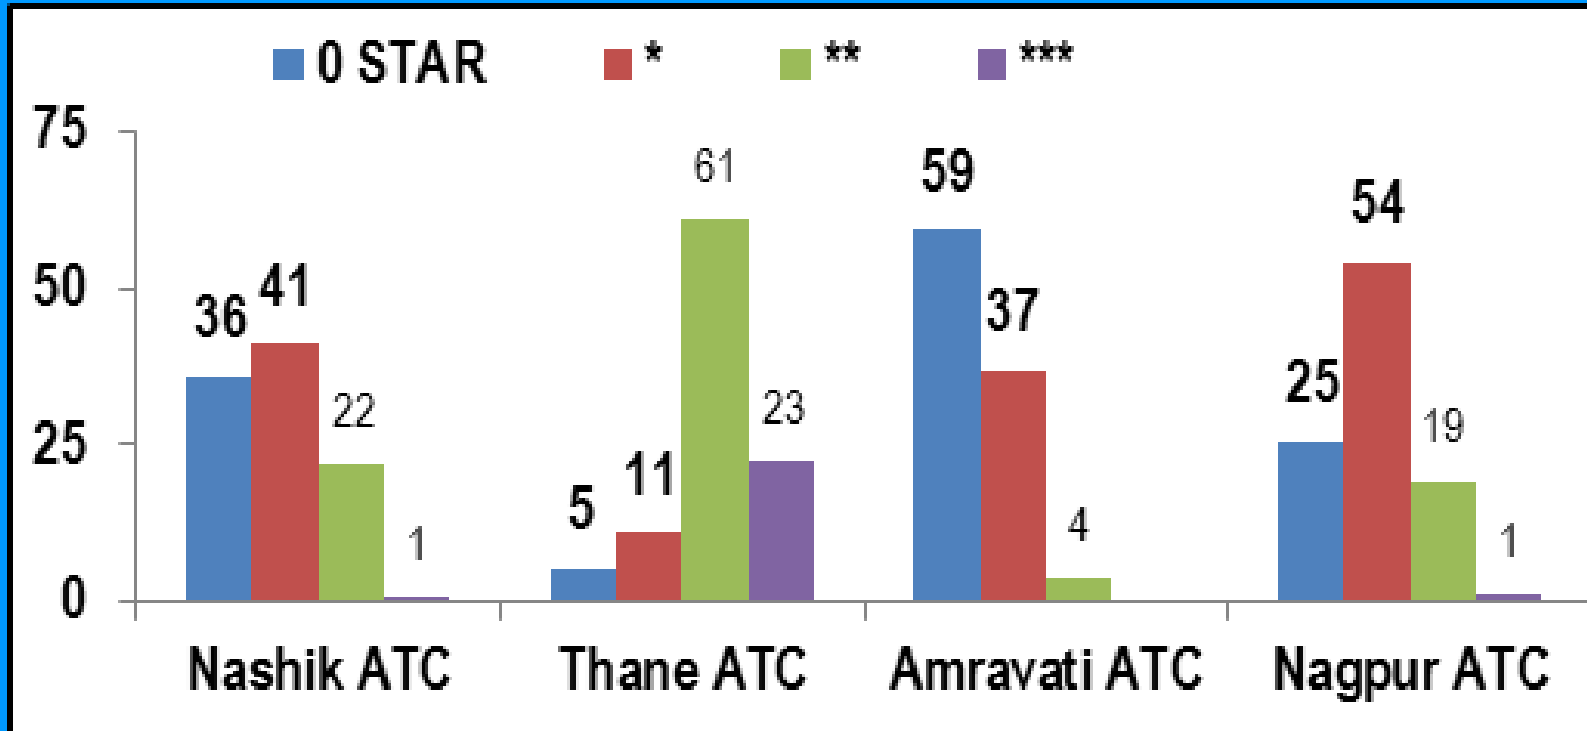

An Eye-Opener: Benchmarking Assessment

514 Ashramshalas
BM done by KRCs 3rd Party

STAR	%	Status	Remark
Zero star	0	30%	Score less than 10
1 star	*	35%	Score between 11 and 17
2 star	**	29%	Score between 18 and 25
3 star	***	6%	Score above 25

An Eye-Opener: Benchmarking Assessment

Progress – Schools with ED

Evidence – Need – Capacities – Action Planning – Institutional Support – Scaling Up

2013-15	2015-16	2016-17	2017-19
DHaAL	MHM Pilots	GR on MHM	District wide approach
Demonstration in 300 Schools	Capacity Building of SSA Engineers	Innovations fund for Group HWWS Stations	MCGM Schools
GR on Handwashing Module	Study on O & M Costs		Composite Grant - MHRD
Advocacy through various platforms			

Tribal Residential Schools

Evidence – Need – Capacities – Action Planning – Institutional Support – Scaling Up

: Challenges (H-S/Ware)

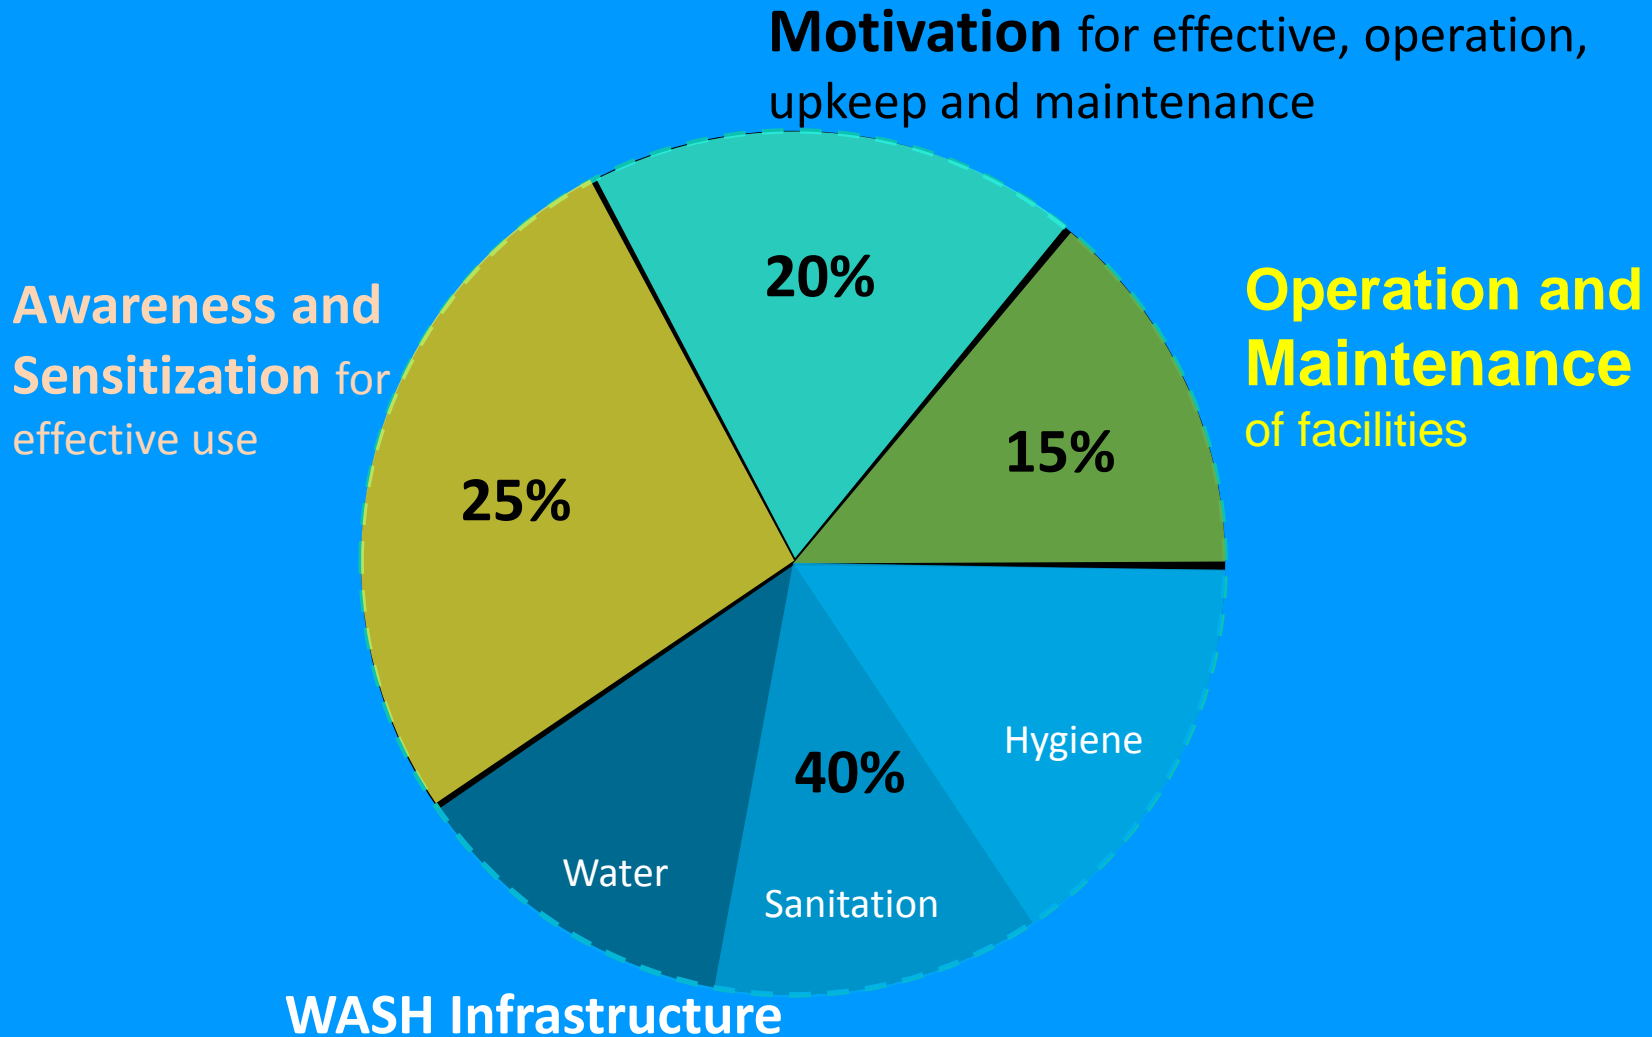

- Reported in DISE data
 - Construction undertaken in TSC, more than 10 to 12 year old
 - Under SSA building fund toilets constructed
 - Water supply is a key, so functionality is must
 - **SBM-G does not cover INFRASTRUCTURE**
 - **Mobilization** is necessary from various sources viz ZP Cess fund, 14th finance commission grants, CSR etc. community contribution
- Operation and maintenance: **Need Attention**

Numbers!

Schools – 100,000

Ashramshalas (Tribal Residential Schools) – 500+

WASH Program Foundation

Poor WASH Practices (Ashramshala photos in 2015)

Water logging with no proper drainage

Lack of functional urinals; Boy urinating

One water point, Many students in queue

Poor waste management: Health hazard

Dys-functional Urinal: buckets stored

Chocked up toilet due to lack of sanitation staff

No designated hand wash or plate wash station

State Level Training of SSA Engineers

225 Engineers (SSA) across Maharashtra were participated

Training of HMs by trained Engineers

Training organised at Kolhapur MNC

After training initiative taken by Engineers in scaling up WinS. Some of them organised training for HMs, some of them organised district and block level meetings of HMs/KPs. In all districts work got started. Nearly 2000 HMs and 200 KPs were facilitated.
