

# Session 4

Images of Group Exercises

DESIRED OUTCOME

FOCAL PROBLEM

Proper regulatory framework + Enforcement

Bus. opportunities out of waste

Perception change: from waste to resource

Increase Include FSM in city planning

Research to be upscaled (Universities)

Root? SOLUTIONS!

More finance -> Gov. budget allocation (priority) - PPP

Standardisation of procedures/concept

Securing funds from public sector

Define discharge standards for FSM-outputs (e.g. incineration, discharge, reuse)

Define national target and enforce it

Define responsible public institution

Resource recovery

EFFECTS & CONSEQUENCES

Healthy Environment

Upscaling FSM

Easier implementation/network of support

Innovative Solutions for cost recovery/savings

Subsidies to organic fertilisers

Subsidy to chemical fertilisers -> clearly linked to Food Security -> over 50 years!

Public awareness creation

Transparency

Make biodegrading compulsory

Multi-stakeholders engagement needed: PS especially

Demand!

Awareness raising @ quality of Co-Compost

Advocacy @ support to organic compost (as a resource)

Provide evidence-based info @ compost: it's safe!

Securing revenue -> tipping fees

no illegal dumping + emptying

Affordability -> IFF level

Availability of Land

more BM infrastructure

Private sector develops technology to achieve target and standards (Composting)

Boost innovation - Creation of jobs (sectors re-orientative)

Use of The facilities (FSM)
