

ECOLOGICAL SANITATION TOILETS

THE KRCS/GRC EXPERIENCE IN
MAKUENI

Introduction

Method used In Makueni:

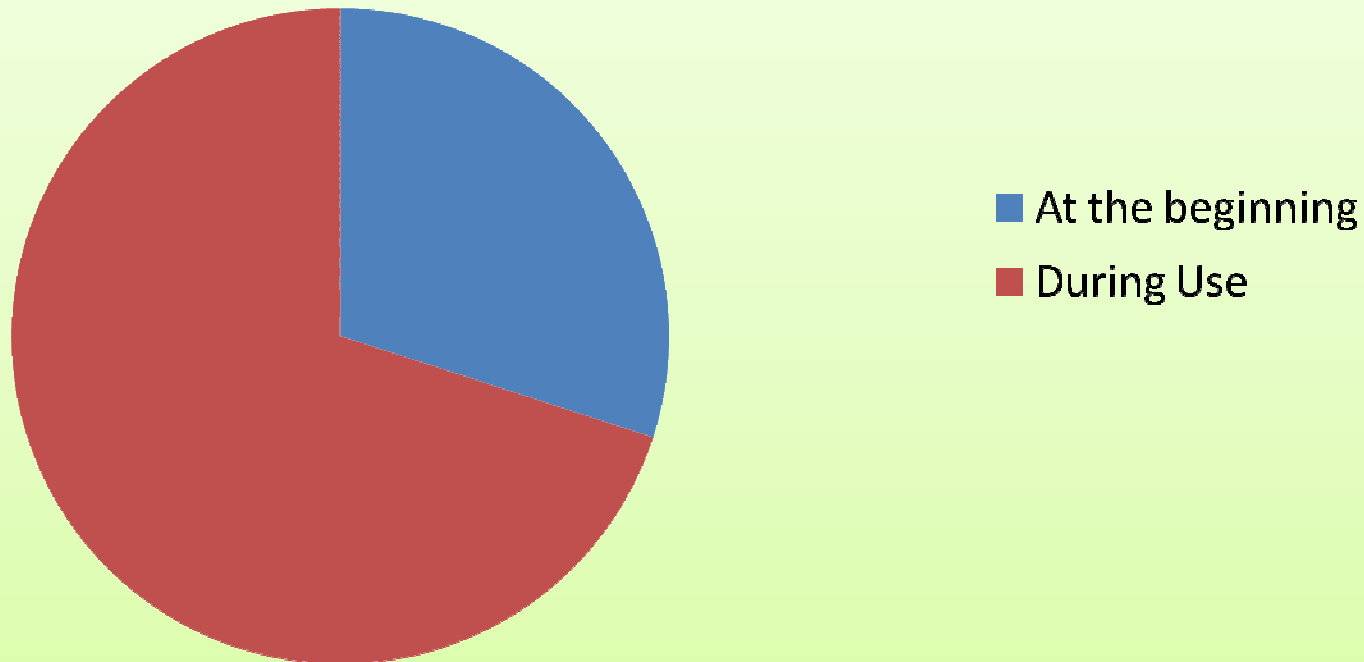

- Training of selected local Artisans
- On site construction by trained artisans
- Training on the Ecosan concept, operation and maintenance of the latrine
- Handover and use

Positive achievements

- Environmental friendliness
- Partial acceptability

Lessons Learned

- Acceptability

Lessons Cont'd

- **Change of school management, teachers and students impede technology uptake:** priorities, knowledge lost
- **Awareness creation and constant follow up** – not a one off show but should be continuous
- **Waste Handling** - Handling of waste like urine became a challenge

Recommendations

- Social marketing
- Thorough pre project advocacy
- Use of already existing facilities during community dissemination sessions and orientations .

Conclusion

- Sustainability need be addressed

THANK YOU!
