

Recap of Day 2

Sustainable Sanitation Workshop

Mtwara 6 – 8 September 2010

Workshop Objectives:

1. Stakeholders learn more about alternative sustainable sanitation solutions
 2. Know more about the advantages of various solutions
 3. No 'one solution' for the whole town hence need to make informed choices
 4. Enable the 7 Towns Management contribute effectively in the strategic planning and conceptual design stage....
- Are we on the right focus?

Recap of Day 2

Sustainable Sanitation Workshop

Mtwara 6 – 8 September 2010

What is the most important lesson for you from day 1 and 2

MOWI

- Many actors that need to be coordinated is the MoU adequate?
- Sanitation not mainstreamed in investments, only studies
- Potentials in using the existing mechanism
- Alternative technologies but sewerage is the ultimate goal
- There is room to contribute in the regulations writing , but how?

POYR

- Water supply is critical for Mtwara and Lindi and so is sanitation
- Traditional pit latrines dominant sanitation in Kigoma, Lindi and Mtwara
- It is important that key stakeholders discuss the proposed options, how?

WaterAid

- Water Aid , Consultants and MOWI statistics : which is which?
- Different actors working together to improve sanitation: how are issues of sustainability and replicability?

ESCA &
MOSHI

- The challenges of managing central sewer systems
- Sewer systems as solid waste dumping areas
- How to motivate LGAs in promoting central sewer systems

BORDA

- Decentralised systems are good but have disadvantages in management
- DEWATS available in different sizes and costs
- The importance of a comprehensive city wide sanitation plan : is this possible for the 7 Towns

DTF
Zambia

- Dealing with sanitation through a Demand Responsive Approach
- The importance of and mechanism for community participation in choosing sanitation option
- A comprehensive list of factors to be considered in selecting sanitation options

WEPMO

- Day 3

Group Work: **Incorporating sanitation requirements in the Feasibility studies and design.**

- 1. What are the challenges facing your WSSA?**
- 2. How can these be dealt with?**
