

SuSanA Vision Documents

Towards More Sustainable Sanitation Solutions

- General statement from SuSanA
- Definition of sustainable sanitation
- Goal and objectives of SuSanA
- A joint roadmap
- Invitation to join and contribute
- info@sustainable-sanitation-alliance.org
- Document has been circulated and is available on the website www.sustainable-sanitation-alliance.org

Sustainable Pathways to Attain the MDGs

- Update of the first version done for the UN Summit on the MDGs in Aug 2005
- Update on the population and number of households throughout the world regions lacking sanitation solutions in urban and rural areas (upgrade of JMP data)
- Scenario for global sustainable sanitation installations according to the MDG to 2015
- Examples of sanitation solutions and unit costs
- Regional costs
- Added value of the recycled excreta nutrients

- Will be discussed in detail tomorrow

Guidelines for Sanitation Action Plans

- Action plans for countries, communities and agencies
- on how sustainable sanitation can be implemented on a large scale
- What means of finance can be developed for its realisation
- To be led by the working group on cost and economics: but requires integrated input from across all SuSanA working groups
- To be discussed now
